Full-Stack Web Developer

Proficient Full-Stack Web Developer with over 2 years of experience in designing, building, and maintaining both front-end and back-end systems. Expertise in developing scalable, high-performance web applications using modern frameworks and technologies. Strong problem-solving abilities, teamwork, and a proactive approach to new challenges. Currently seeking opportunities various technology, sector to apply technical expertise and contribute to innovative solutions.

Skills

- Teamwork & Collaboration | Problem Solving | Adaptability | Time Management
- Attention to Detail | Agile Development | Project Management
- Front-End Development
 - Responsive Web Design | UI/UX Principles
 - Node.js, Express.js | Prisma, Mongoose
- Back-End Development
 - HTML, CSS, JavaScript, React, Next.js
 - RESTful APIs | Database Management
- Version Control & Tools
 - Git, GitHub | Zustand, Redux, Redux toolkit
 - Dynamic UI Components | Performance Optimization

Experience

Full-Stack Web Developer

Jan. 2024 - Present

Prime Technologies

- Developed and maintained key web applications using HTML, CSS, JavaScript, and modern frameworks (NextJs), increasing scalability by 30%.
- Designed APIs with Node.js and managed MongoDB databases, enhancing system security by 50%.
- Collaborated with cross-functional teams to implement new features, increasing user engagement by 20%.
- Provided instruction and mentorship to junior developers, fostering their technical growth and professional development
- Led efforts to optimize application speed and scalability, boosting performance by 30%.
- Resolved complex technical issues, ensuring uninterrupted service for over 10,000 users. Led a team through the ideation, structuring, and development phases of a product, ensuring successful execution and delivery.

Frontend Web Developer

Jan. 2024 - Present

Dispatch Hub

- Developed and maintained web applications using NextJS and modern frameworks, increasing scalability by 20%.
- Designed APIs with Node.js and managed MongoDB databases, enhancing system security by 50%.

- Collaborated with cross-functional teams to implement new features, increasing user engagement by 40% and Improved user engagement by refining navigation and enhancing UI consistency across the platform..
- Provided instruction and mentorship to junior developers, fostering their technical growth and professional development
- Led efforts to optimize application speed and scalability, boosting performance by 30%.

Backend Developer Intern

May 2024 - Aug. 2024

Nerahubs

- spear-headed a cross-functional team in development and implemented scalable backend solutions using Node.js and Express.js, ensuring system reliability and performance.boosted company's dependability for skilled engineers by 40%.
- Coordinated closely with frontend developers to achieve seamless integration of backend API's, hence reducing run time cost by 20%.
- Conducted code reviews, mentored junior developers, and facilitated knowledge-sharing sessions to promote best coding practices and team growth, under supervision by a senior engineer, hence expanding teaching skills by 50%.
- Drafted a 3 month sprint document , assigned roles and Introduced the AGILE methodology to organize project timelines, delegated tasks and ensured on-time delivery of key milestones.
- Collaborated with stakeholders to gather technical requirements, provide updates, and incorporate feedback to refine product development, expanding user experience of application by 40%.
- Demonstrated advanced problem-solving abilities by resolving technical challenges and enhancing system performance,finding and solving bugs contributed to overall project success by 30%.

Backend Developer

October 2024 - Present

Agromarket NG

- Developed AgroMarket NG, an agricultural platform with an integrated logistics system that allows farmers to sell crops and buyers to purchase them.
- Coordinated closely with frontend developers to achieve seamless integration of backend API's, hence reducing run time cost by 20%.
- Collaborated closely with team members to enhance the user experience, driving a 25% increase in user satisfaction
- Facilitated the growth of a sustainable agricultural ecosystem by supporting a secure, efficient, and scalable platform for over 800 active users.

Freelance Web Developer

Jun. 2022 - Present

Upwork

- Developed full-stack web applications for a variety of clients across multiple industries, focusing on delivering secure, scalable, and high-performance solutions tailored to specific business needs and promote sales by 10%.
- Built user-friendly and responsive interfaces using, advanced libraries like React and Next.js. These interfaces increases user engagement but also accounted to 20% increase in customer satisfaction by simplifying navigation experience.

- Managed large-scale MongoDB databases to handle extensive data sets efficiently. Implemented database indexing and optimized data models to improve query performance and reduce response times for data-intensive operations.
- Collaborated with senior developers on complex, projects, contributing to both frontend and backend solutions. Took a proactive role in debugging issues, refining system architecture, improved overall system stability and usability by 15%.

Education

Bachelor of Applied Technology in Software Development

Anticipated 2027

Brigham Young University

- Web and Computer Programming
- Object-Oriented Programming, Algorithms, and Data Structures

Pathway Connect Certificate

2024

Byu Pathway Worldwide

- Teamwork & Collaboration | Time Management | Decision-Making

Full-Stack Web Development

2024

Nera Tech Hubs

- Responsive web Development HTML CSS | JavaScript fundamental |
- React-JS Component Based Programming
- Backend fundamentals with Node-JS, Express-JS, MongoDB

Responsive web design and Javascript

2022

Freecodecamp

- Responsive web design principles | web accessibility | web layout and styling
